

## Treatment of DVT and PE

- The recommended dose of Fondaparinux Sodium Injection is 5 mg (body weight < 50 kg), 7.5 mg (body weight 50-100 kg) or 10 mg (body weight > 100 kg) by subcutaneous injection once daily.
- Concomitant oral anticoagulation treatment should be initiated as soon as possible, usually within 72 hours. Fondaparinux Sodium Injection treatment should be continued for at least 5 days and until a therapeutic oral anticoagulant effect is established (INR 2.0 to 3.0).
- The average duration of administration is 7 days.
